

# Kishinchand Chellaram College, Mumbai – 20.

FY/SY /TY B. Sc. (I. T) Semester \_\_\_\_\_

## Practical 1

**Aim:** Write a C# script for implementing virtual environment for making an object jump.

### Steps:

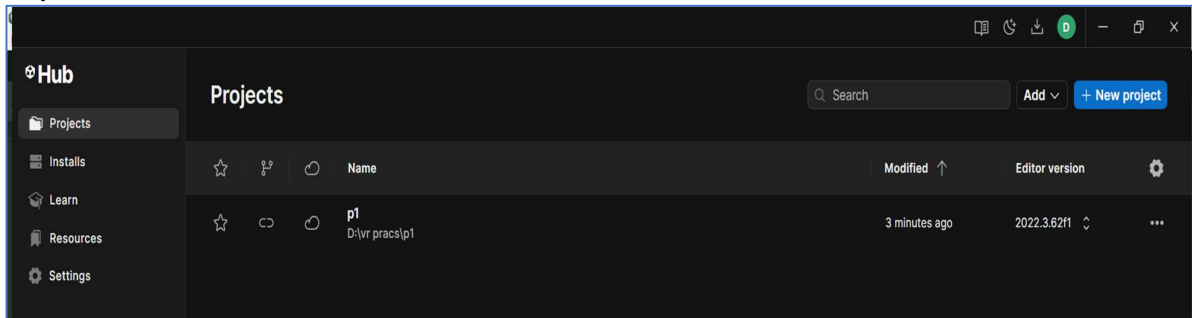

Step No.	Step
1.	Open Unity3D
2.	Click on New Project --> Select 'All Templates' --> Select 3D Core --> Give a Project Name --> Click on Create Project
3.	Double Click on the Project Created
4.	Select Game Object --> 3D Object --> Plane
5.	Select Game Object --> 3D Object --> Sphere
6.	Now Click on 'Add Component' --> Select 'Rigid Body'
7.	Now Click on 'Add Component' --> Type a <u>new name</u> --> Select Script --> Select Create and Add
8.	Double Click on the Script File Created
9.	Type the code in the file that opens: <pre>using System.Collections; using System.Collections.Generic; using UnityEngine; public class Sample : MonoBehaviour {     //Rigidbody rb;     Rigidbody rb2;     // Start is called before the first frame update     void Start()     {         // rb = gameObject.GetComponent&lt;Rigidbody&gt;();         rb2 = gameObject.GetComponent&lt;Rigidbody&gt;();     }     // Update is called once per frame     void Update()     {         if(Input.GetKeyDown(KeyCode.Space))         {             rb2.AddForce(Vector3.up * 10,ForceMode.Impulse);         }     } }</pre>
10.	Save and Go Back TO Unity3D
11.	Click on the 'Green Play Button' or 'Run'

## Step 9:

### C# Code

```
using System.Collections;
using System.Collections.Generic;
using UnityEngine;
public class Sample : MonoBehaviour
{
    //Rigidbody rb;
    Rigidbody rb2;
    // Start is called before the first frame update
    void Start()
    {
        // rb = gameObject.GetComponent<Rigidbody>();
        rb2 = gameObject.GetComponent<Rigidbody>();
    }
    // Update is called once per frame
    void Update()
    {
        if(Input.GetKeyDown(KeyCode.Space))
        {
            rb2.AddForce(Vector3.up * 10,ForceMode.Impulse);
        }
    }
}
```

**Step 10:** Run the file in Unity3D and see the output.

# Kishinchand Chellaram College, Mumbai – 20.

        offset = transform.position - player.transform.position;
    }
    // Update is called once per frame
    void Update()
    {
        }
    void LateUpdate()
    {
        transform.position = player.transform.position + offset;
    }
}
```

**Step 10:** Run the file in Unity3D and see the output.

# Kishinchand Chellaram College, Mumbai – 20.
